SCHOOL CLOSES ITS FIRST YEAR

Bright Prospects for Future of Normal and Industrial for Women.

(Special to The Times-Dispatch.)
Harrisonburg, Va., June 16.—The first nine-months' session of the new Normal and Industrial School for Women recently established by the State Legislature at Harrisonburg came to an end Tuesday. The chief feature of the occasion was an address by His Excellency the Governor of Virginia, who was introduced by State Senator George B. Keezell. No diplomas were awarded, but a large number of the young women received certificates which will be accepted by the State Board of Examiners as entitling them to teach in the schools.

The commencement sermon was delivered Sunday morning by Bishop R. G. Waterhouse, late president of Emory and Henry College. The annual sermon before the Young Woman's Christian Association was preached Sunday night by Rev. W. D. Smith, of Winchester. The field day exercises planned for Monday afternoon, as well as the exhibits in the departments of manual arts and domestic science, were considerably hindered by the continued rain, but on the whole the day was well enjoyed by a large number of visitors.

Forty-seven counties, as well as eight cities of Virginia, together with three other States, have been represented in the 205 students enrolled during the year. The students have cooperated heartily with the faculty in every respect and have inaugurated practically every form of activity properly belonging to such a school. The Young Woman's Christian Association, the Lee and Lanier Literary Societies, a general athletic association, with various departments, together with the different class organizations, have all been perfected. Several excellent dramatic performances have been presented by the classes and societies. No sororities are in evidence, but a strong social spirit of democratic scope has been manifested. A handsomely illustrated annual of 150 pages, "The School-gram," has been published by a student board. The student-body has drawn up and adopted a code of rules governing the honor system that they have already put in effect.

The recognition that the school has received on all hands is very gratifying. Numerous distinguished educators and others have visited the institution, and expressed their gratification at the evidences of efficiency and progress. Near the beginning of the session Governor Swanson was an honored guest, and at the close Governor Mann was the orator.

Following the commencement exercises, the Governor and the trustees of the school, who were present, were driven to the normal for dinner. One item on the bill of fare was green peas from the garden of the class, in rural arts.

COTTON MILL MEN MEET.

Condemn Rules of New York Stock Exchange.

(Special to The Times-Dispatch.)

Charlotte, N. C., June 16.—Resolutions condemning the rules of the New York stock exchange, which encourage speculation and manipulation, were adopted at the annual session here to-day of the North Carolina Cotton Manufacturers' Association. The association also admits Virginia mills to the organization. Plans were also adopted dividing the association into five sub-organizations—gray or white goods, colored goods, hard yarns, soft yarns, knit goods.

The parent organizations will remain intact and in control, but each department may hold separate meetings, to thresh out the problems peculiar to

itself. Reports show 322 cotton mills and 171 yarn mills in the organization, with 3,229,119 spindles, amounting to about one-fourth the looms and one-third the spindles in the South.

R. M. Miller, Jr., of Charlotte, was elected president.

The association failed to take any official action on the matter of curtailment, as has been anticipated. It is understood unofficially, however, that probably all the members have agreed to a complete curtailment in August, to continue until the market advances.
